SUMMARY

Final-year B.Tech Mechanical Engineering student seeking an entry-level engineering opportunity to apply academic knowledge and practical skills. Possess knowledge of design, manufacturing processes, quality control, engineering materials, and CAD software such as AutoCAD, CATIA, Fusion 360, and basic ANSYS. Strong analytical thinking, adaptability, teamwork, and communication skills with a keen interest in continuous learning, innovation, and solving engineering challenges.

KEY SKILLS

- Designing skills: AutoCAD, Fusion 360, ANSYS (basic FEA), CATIA.
- Technical skills: Engineering Drawing, Manufacturing Processes, Engineering Materials.
- Soft Skills: Communication Skills, Time Management, Leadership, Adaptability, Quick Learning.

EDUCATION

Suresh School

- SSC with CGPA of 9.7

Andhra Polytechnic, Kakinada

2021 – 2024

- Diploma in Mechanical Engineering with percentage of 68%

Anil Neerukonda Institute of Technology and Sciences

2024 – 2027

- B.Tech in Mechanical Engineering with CGPA of 7.2

INTERNSHIP EXPERIENCE

Mechanical Engineering Intern, SV Engineering Works

December 2023 – May 2024 (6 months)

- Gained hands-on industrial experience in sheet metal fabrication and manufacturing processes.

CATIA Design Intern, HMI Solutions

May 2025 – June 2025 (1 month)

- Learned to create 3D part models, assemblies, and 2D engineering drawings using CATIA.

Non-Destructive Testing (NDT) Intern, RVS Quality Certification Pvt. Ltd.

May 2026 – June 2026

- Gained practical knowledge of Liquid Penetrant Testing (LPT), Magnetic Particle Testing (MPT), Ultrasonic Testing (UT), and Visual Testing (VT).
- Learned inspection procedures, defect identification, interpretation of test results, and quality assurance practices.

PROJECTS

Pick and Place Rover | Diploma Project

- Designed and developed a Pick and Place Rover capable of moving objects from one location to another using a robotic arm mechanism.
- Integrated mechanical components with motor-driven movement to perform object handling operations.

Innovation & Project Idea: Smart Sleep Detection Wristband for Automatic Music Control (Concept)

- Proposed a wearable smart wristband concept that detects the user's sleep state using wrist-based sensors.
- The system is designed to automatically pause or stop music playback once sleep is detected, improving user comfort and reducing unnecessary battery consumption.
- The concept aims to integrate sleep detection, sensor technology, and mobile device connectivity for a seamless user experience.

ACHIEVEMENTS & CERTIFICATIONS

- Fire Safety Workshop

- NDT Workshop
- HMI Solutions
- RVS Quality Pvt. Ltd.

KNOWN LANGUAGES

- English
- Telugu
- Hindi (Basic)
