+91 9391725373 | rupesh72111221@gmail.com | [github.com/rupesh12k6](https://github.com/rupesh12k6) | [linkedin.com/in/rupesh-r-84b183311](https://linkedin.com/in/rupesh-r-84b183311) | Visakhapatnam, India

## PROFESSIONAL SUMMARY

Software developer with a strong foundation in object-oriented design, data structures, and algorithms, and hands-on proficiency across Java, Spring Boot, and modern web technologies. Comfortable owning a system end to end — schema design, secure REST APIs, authentication, and relational + in-memory data stores (PostgreSQL, MySQL, Redis) — with practical experience across backend services, full-stack integration, and cloud deployment. Adaptable across Java Developer, Backend Developer, and Full-Stack Developer roles.

## TECHNICAL SKILLS

**Languages:** Java, SQL, Python, C  
**Backend & Frameworks:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JDBC  
**APIs & Tools:** RESTful APIs, JWT, Postman, Docker, Git, GitHub  
**Databases & Caching:** PostgreSQL, MySQL, Redis  
**Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## PROJECTS

### DriveFlow — Campus Recruitment Platform [drive-flow-eight.vercel.app](https://drive-flow-eight.vercel.app) | [github.com/rupesh12k6/DriveFlow\\_backend](https://github.com/rupesh12k6/DriveFlow_backend)

Java, Spring Boot, Spring Security, JWT, Spring Data JPA, PostgreSQL (Neon), REST APIs, React, Render, Vercel

- Architected a secure, multi-role (Student / Company / Admin / Super Admin) recruitment platform enforcing endpoint-level authorization with Spring Security and JWT-based access + rotating refresh tokens.
- Designed and shipped 50+ RESTful APIs covering the full drive lifecycle (draft → published → active → closed), automated eligibility matching against student profiles, and round-wise scoring and shortlisting (top-K and cutoff-based).
- Modeled a normalized PostgreSQL schema (Students, Drives, Eligibility, Applications, Rounds) on Neon, with paginated endpoints to keep response sizes bounded under load.
- Built a secure resume-preview pipeline that proxies and streams PDFs from Cloudinary for inline viewing, restricting company access to resumes of only their own applicants.
- Deployed the full-stack system end to end — React frontend on Vercel, containerized Spring Boot backend on Render — with environment-based configuration for production.

### BotShield API — Anti-Spam Social Media Backend [github.com/rupesh12k6/BotShieldAPI](https://github.com/rupesh12k6/BotShieldAPI)

Java, Spring Boot, PostgreSQL, Redis, REST APIs, Docker, Concurrency Control

- Built a layered Spring Boot backend for users, bots, posts, threaded/nested comments (depth-limited to 20), and likes, backed by PostgreSQL as the system of record.
- Implemented a real-time virality scoring engine using atomic Redis INCRBY operations (user comment +50, bot comment +1, like +20), keeping scores consistent under concurrent writes without locking the database.
- Designed bot-spam guardrails: a 100-reply-per-post cap and a 15-minute per-bot-per-user cooldown via Redis TTL auto-expiring keys.
- Built a real-time trending leaderboard using Redis Sorted Sets (ZSET) for  $O(\log N)$  ranked inserts and lookups, avoiding expensive aggregate queries against PostgreSQL.
- Architected a hybrid PostgreSQL-Redis system (DB as source of truth, Redis for high-frequency derived state) to cut database load on read-heavy, real-time operations.

## PROFESSIONAL EXPERIENCE

### Ascendix Solutions — Java Developer Intern

May 2025 – June 2025

- Built a Student Management System with a Java Swing GUI and JDBC integration, implementing real-time, multi-field search over a live database-backed record set.
- Developed a desktop Currency Converter integrating the ExchangeRate-API for live rates, with a custom-styled, animated Swing interface.
- Implemented a console-based Library Management System supporting multi-criteria book search (title, author, ISBN, category) and dynamic inventory/data management through a menu-driven interface.

## EDUCATION

### B.Tech in Computer Science & Engineering

Expected: May 2027

Anil Neerukonda Institute of Technology & Sciences, Visakhapatnam | CGPA: 9.16/10.0

## ACHIEVEMENTS & CERTIFICATIONS

- Competitive Programming: Solved 350+ problems on LeetCode and 150+ on GeeksforGeeks, demonstrating strong algorithmic problem-solving ability.
- Awards: 1st Place, Code Velocity Competitive Programming Event; 1st Prize, TechNova National Coding Contest.
- Certifications: Cybersecurity Workshop Certification (Cyberthreya); Agentic AI Training Program (Capabl India).
